

SEALING TOOL Data Sheet

The Acme **Sealing Tools** are manufactured from cast carbon steel and chrome plated for protection. The tools are supplied with round dies, plain or corrugated for effective crimping of all Acme Lead Seals, the plastic YP10 and Crimp Seals. Non standard engraved dies can be supplied to emboss or deboss characters or numbers onto the seal when it is crimped closed. The sealing tools may also be used to mark other materials such as aluminum plate or laminated card.
